massive open online courses
for development

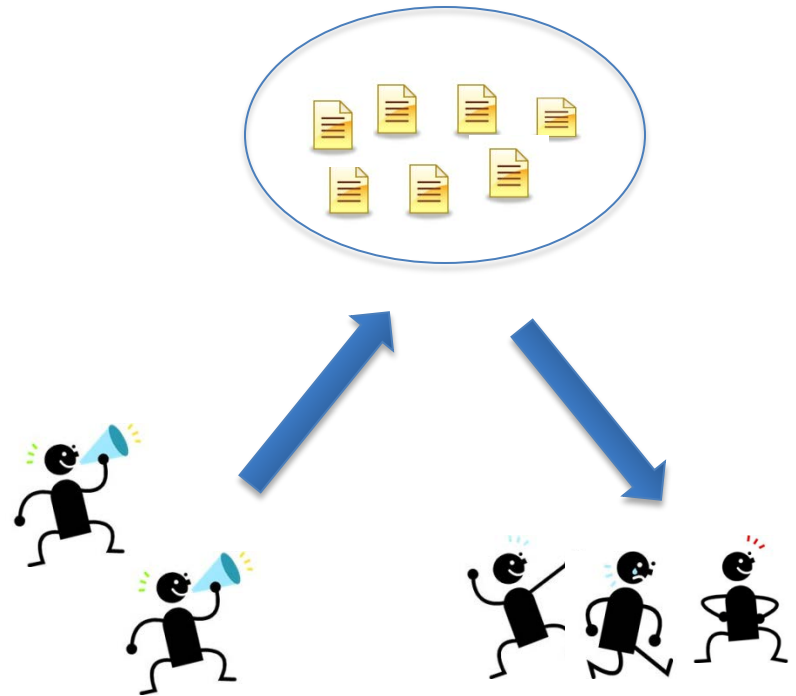

MOOC on M4D 2013

T.V. Prabhakar

IIT Kanpur

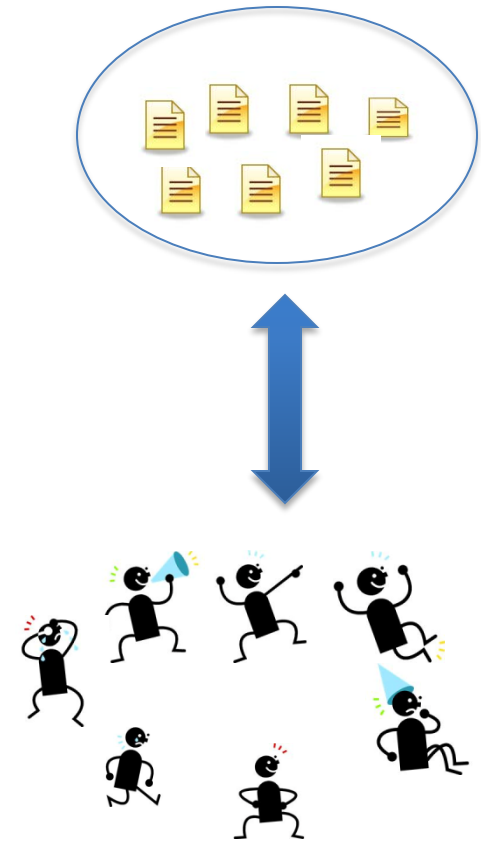

This is how it started

- The web is a publishing platform
- Content in hypertext(hypermedia) form
- The author puts up content – others read it
- One way:
author → reader
- The reader can not change the content
- Like most Institutional websites
- It is a *read only web*

What if the reader can change web site content?

- Everybody can add/edit content
- There is no single author
- Everybody is an author!

Read Write Web

- Collaboration platform
 - Content creation: Wikipedia
 - Problem Solving: Forum
- Interaction Platform
 - Chat room, Forum
- Knowledge Management
 - Collate
 - Comment

THANK YOU
